

0 pre-experiment
recommendation

1 day-0 design, then
branch: Full | Endpoint

2 main loop, one call
at a time (below)

3 budget nearly spent:
advance to day 365, recommend

1 Assemble prompt

 **system message**
task, tools, reply format

 **state digest**
day, budgets, crops, margins

 **last 6 turns**
older ones as one-line stubs

 **own notes**
written by the model,
≤2,000 chars

2

firewall:
no hidden
site info

3 Model call

one reply =
one JSON object

 hash-audited
≤200 calls;
≤80k chars
per prompt

4 Parse

```
{ "type":  
  "campaign", ... }  
action
```

```
{ "type": "tool",  
  "name": ... }  
tool call
```

malformed or
invalid

+ optional notes

5 Executor

start, stop, advance,
observe, recommend

analysis tools:
no time passes

returned as feedback;
the method's own error

⑥ record reply + result in the history, next call
